

# Point Estimates Are Quite Consistent Across Methods, While Confidence Intervals Vary Slightly Across Methods, Especially for Methods 2A and 3 versus 2B

**2A: Pooled Analysis of Individual Participant Data using Contrasts**

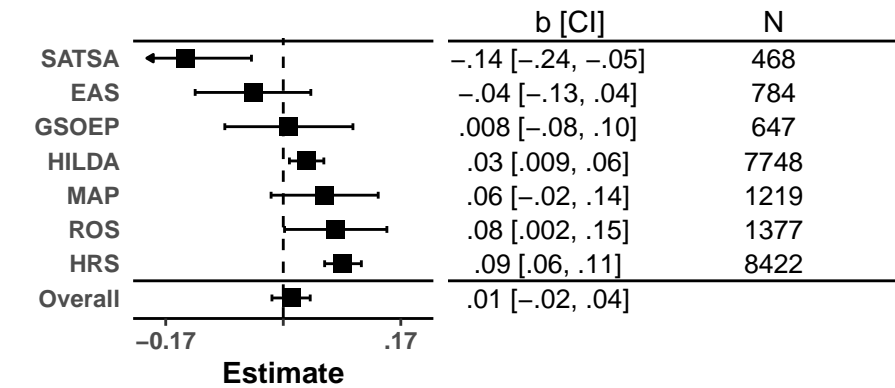

*Extraversion*

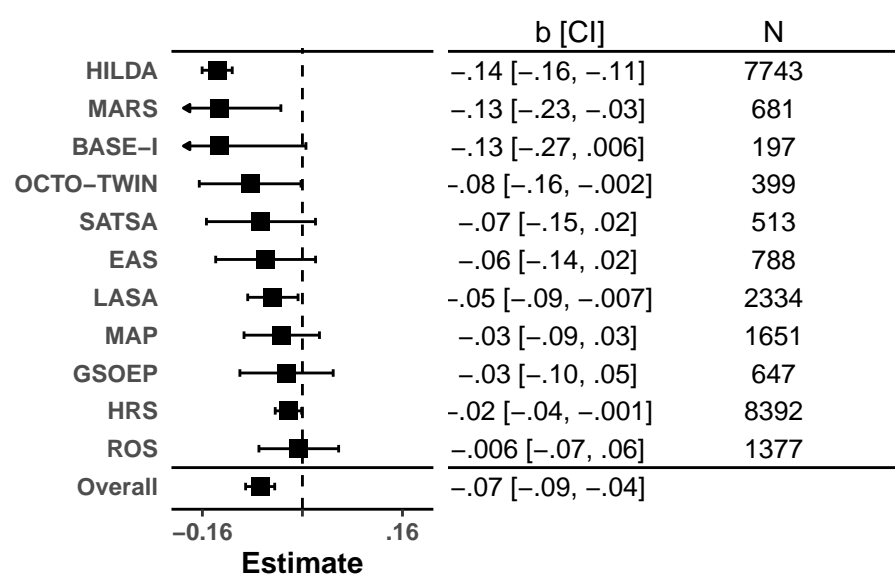

*Aareeableness*

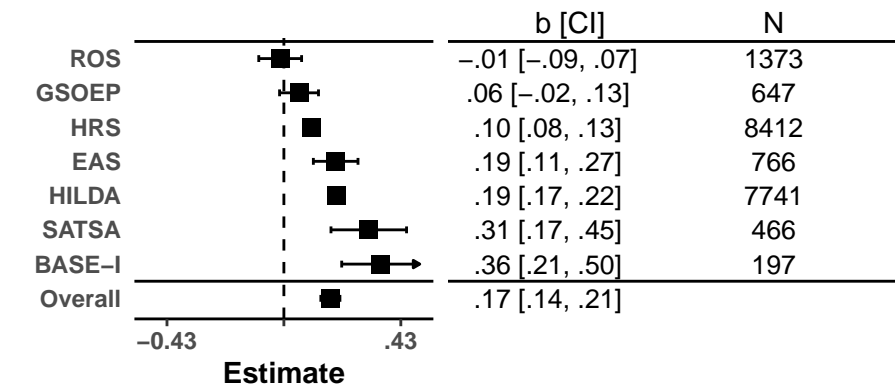

*Conscientiousness*

*Neuroticism*

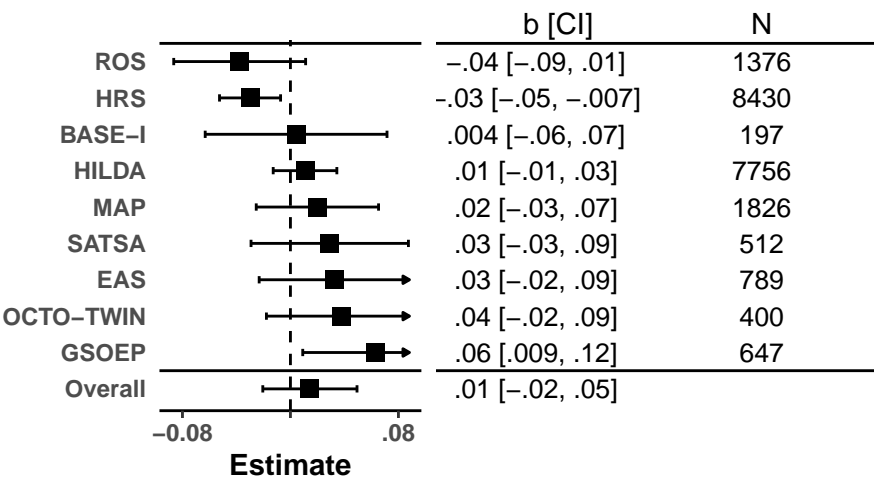

*Openness to Experience*

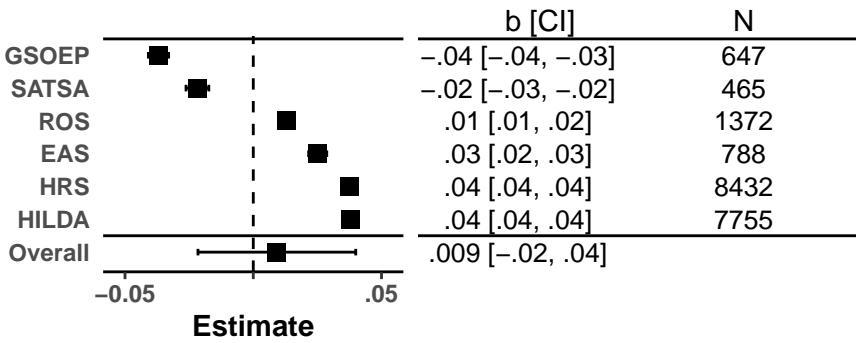

**2B: Pooled Analysis of Individual Participant Data using Random Effects**

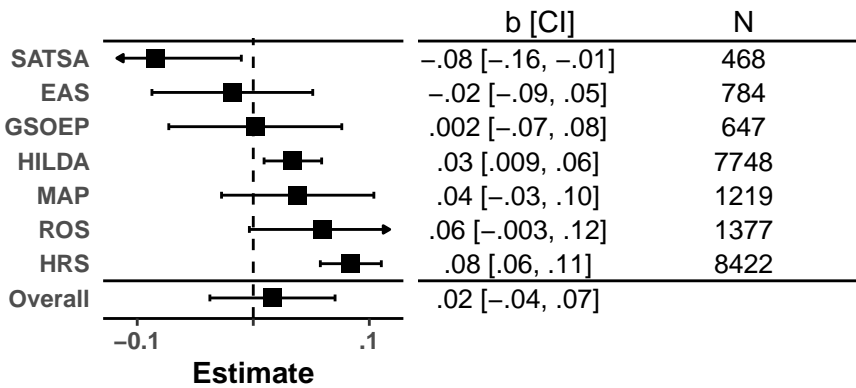

*Extraversion*

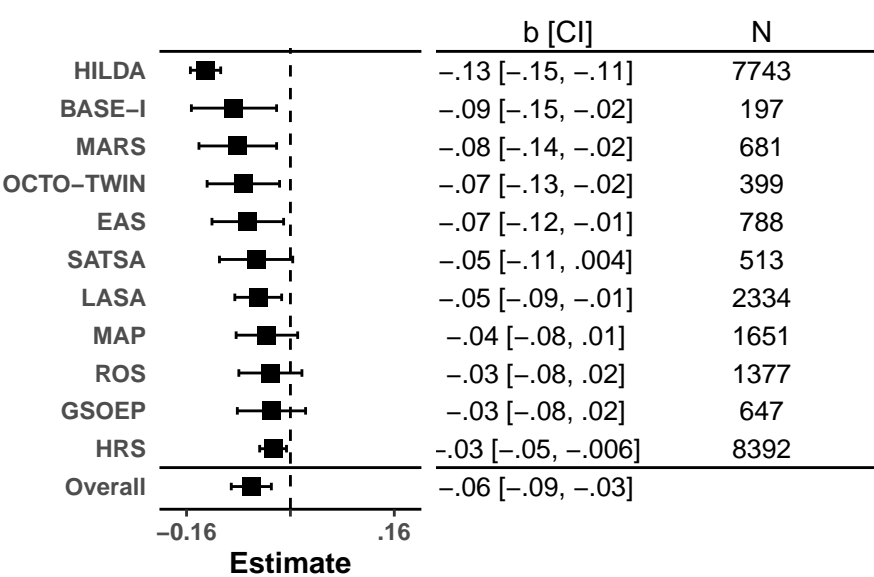

*Aareeableness*

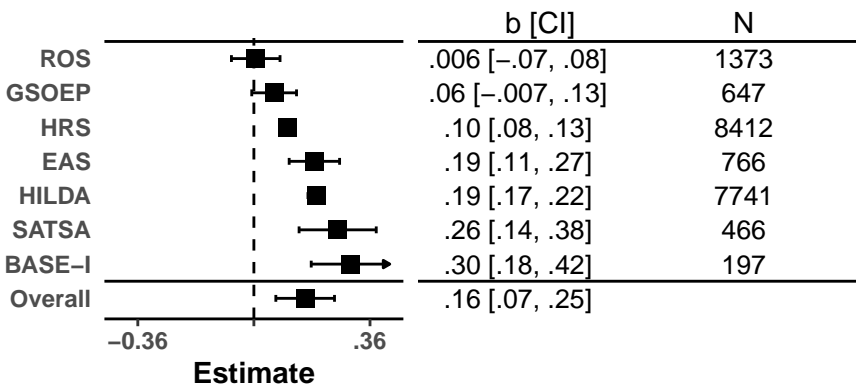

*Conscientiousness*

*Neuroticism*

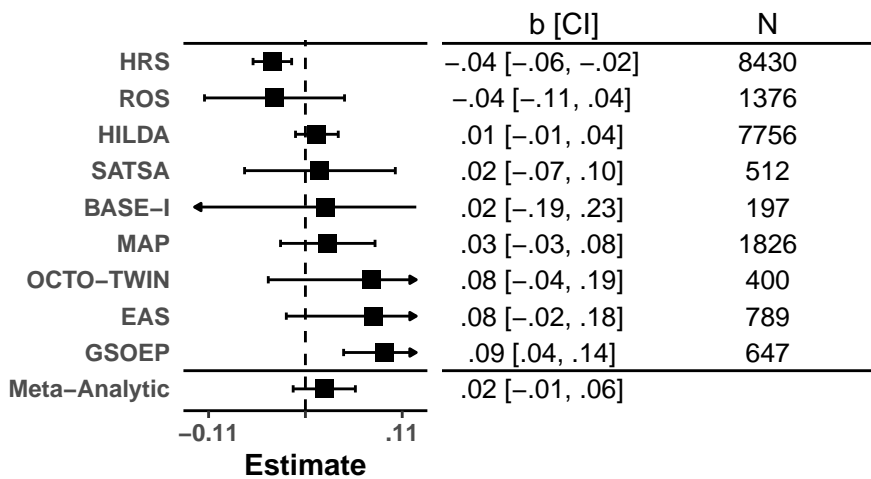

*Openness to Experience*

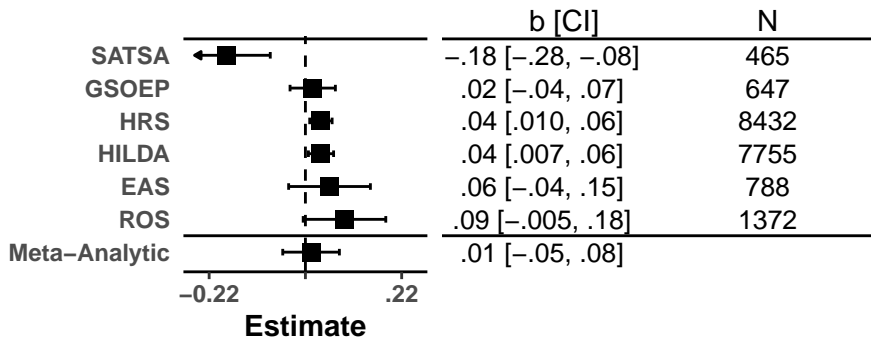

**3: Separate Analyses Followed by Meta-Analysis**

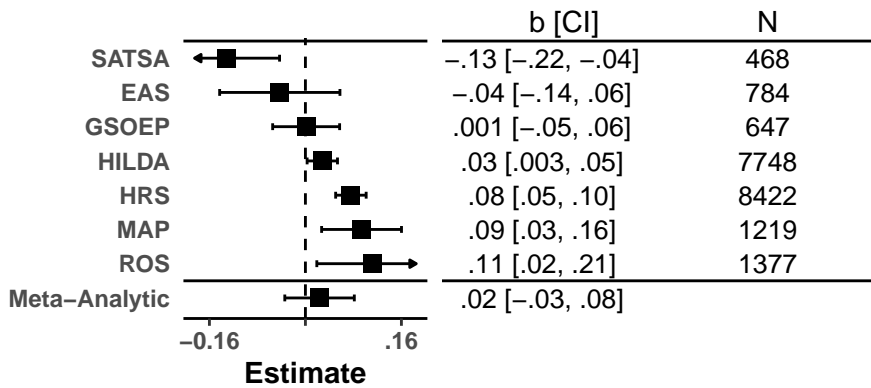

*Extraversion*

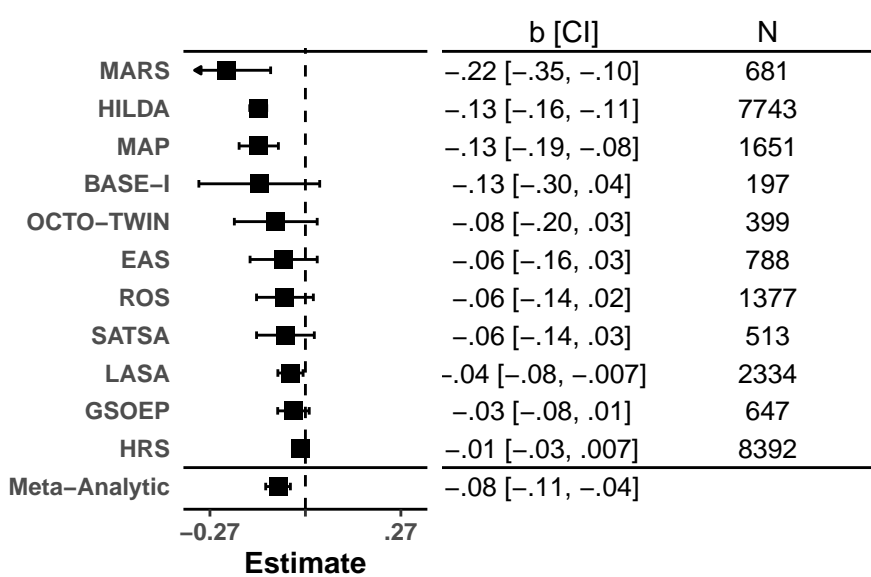

*Aareeableness*

*Conscientiousness*

*Neuroticism*

*Openness to Experience*
